

Towards a new media environment!

Hipp Media is a media production company focused on live streaming. Our live broadcasts ranges from lectures and conferences to music events and fashion shows.

Live Streaming is a very efficient communication tool, which not only has an incredible coverage in terms of spreading, but also provides a unique opportunity to reach an audience who would not otherwise be able to participate. It simply is the future of communication!

We have had many successful collaborations in recent years. Here are some examples:

- **Malmö University** lecture Jesse Jackson in 2011, talks Douglas Trumbull 2011
- **City of Malmö** Fairtrade city conference 2011, ICSEI Conference 2012
- **University of Copenhagen** CGIAR Research Program on Climate Change, Oxford University 2012
- **Malmö Tillskärarakademi** Fashion Show 2011

Hipp Media delivers high-quality productions at affordable rates. Our base is in Malmö, but our field of operation is unlimited.

We provide all equipment and our expertise covers the entire process from vision to finished product.
